

## **Problem statements**

- Noel is an old librarian who wants proper healthcare in his old age but he lives in middle of nowhere with little to no professional hospital care.
- Peter is a tech savvy doctor who wants to use his knowledge to help people through technology but he doesn't have the right tools for it.
- Charles is a busy stock trader who needs to know which type of arrhythmia he has and the measures he has to take to safeguard himself because he doesn't want to go to a doctor as he is afraid of losing tons of money.
- Kyle is an experienced doctor wants to help people through modern technology but he doesn't have sufficient technological knowledge to do something on his own.
- Grace is an Emergency Medical Technician (EMT) who sometimes comes across patients suffering arrhythmia and she needs to know which variant of arrhythmia it is before providing treatment but doctors might not be free to answer her queries.
- Ann is a talented politician who needs to verify whether she suffers any heart diseases but she can't publicly disclose her results afraid whether it would affect her political standing.
